CLERK OF THE CIRCUIT COURT
PROPOSED GRANT AWARD

ITEM #22

REFERRED TO COMMITTEE ON TECHNOLOGY #310951

Transmitting a Communication, dated January 6, 2011 from

DOROTHY A. BROWN, Clerk of the Circuit Court

requesting authorization to accept a grant award in the amount of \$129,600.00 from the Illinois Criminal Justice Information Authority (ICJIA). The funds will be used to improve disposition reporting to Illinois State Police. This grant requires a cash match or an in-kind match of a minimum of 20 percent to provide for the additional funds for providing an overall method or system of correcting the rejected postings from the Illinois State Police's Criminal History Record Information (CHRI) system.

As the Clerk of the Circuit Court (CCC) lacks an overall method or system of correcting the rejected postings from the Illinois State Police's CHRI system, CCC is proposing to build an application that will process the rejected dispositions that did not post to CHRI, provide a user interface to allow for updates to the information contained in the Clerk's disposition reporting, and to transmit that information so that it successfully posts to CHRI. This solution will specifically provide for:

- Automating the interface of records that are pushed back to CCC for correction and resubmission to ISP's system for updating to CHRI; and

- Implementing improved data capture procedures (technical and operational) that would facilitate complete arrest reporting, research missing dispositions and information for reporting to ISP's system; and

- Reengineering business processes that are impacted by the new application build; and

- Examining and improving data collection at critical points throughout the justice process; and

- Establishing more effective accuracy and information quality and auditable controls; and

- Reducing the backlog of missing disposition or related information.

Additionally, the solution will have to examine the collection points of information coming into the Circuit Court. There may be opportunities for improvements in receiving critical data through an electronic exchange as opposed to many of manual entry points that exist today. Lastly, CCC will also add stakeholders to the project as necessary, especially as it relates to agencies that are identified through the data collection and exchange points, where improvements can be made in ensuring accurate and complete information at its point of origin. Justice XML standards will be used as appropriate.

Estimated Fiscal Impact: \$32,400.00. (528-818 Account). Grant Award: \$129,600.00. Funding period: January 1, 2011 through March 31, 2012.

Sufficient funds are available in the Circuit Court Automation Fund.

Three hundred detainees returning to Austin, Garfield Park and Lawndale will receive a wide range of services. These three (3) targeted neighborhoods experience higher rates of crime, are disproportionately represented in the jail's population, and experience higher recidivism rates than release from other communities.
